OVERVIEW

WHICH DECKING IS RIGHT FOR YOU?

MINERAL-BASED COMPOSITE

Voyage Deck & Dock Board

Since its creation in 2007, Eovations™ technology has perfected the substrate found in several Deckorators® decking products. The unique process starts with a mixture of polypropylene and calcium carbonate that's pultruded, which creates cavitation or tiny air pockets. This keeps the boards lightweight, but with a fiber-like structure similar to wood, providing unmatched strength.

All Deckorators® decking offers:

- 20-year Stain and Fade
- 20-year Structural

When installed by a Deckorators® Certified Pro, all Deckorators decking offers:

- 25-year Stain and Fade
- 25-year Structural
- 25-year Removal & Replacement

TRADITIONAL COMPOSITE

Heritage

Deckorators® wood plastic composite decking is created by a unique extrusion process resulting in a stronger and more reliable deck board. The boards are capped on three sides with some of the most durable polymer technology available.

RECOMMENDED FASTENERS

STOWAWAY™ HIDDEN FASTENER

Deckorators® Stowaway™ hidden fasteners discreetly secure deck boards to joists using the slotted edges of decking.

Stowaway hidden fasteners provide a fastener-free look and consistent 6mm spacing between deck boards.
